---

---

A RARE OPPORTUNITY FOR SECURING CHOICE BREEDERS FOR  
FALL AND WINTER MATING.  
EGGS IN SEASON.

---

*Address*

**CYPHERS INCUBATOR CO.,**  
**Buffalo, New York.**

THE CYPHERS INCUBATOR COMPANY has for several years conducted a large poultry farm, annually producing several thousand birds, both for breeding stock and market purposes. We have aimed to improve our stock each year, by carefully selecting the breeding birds and mating them for best results; both for producing stock as nearly as possible meeting the requirements of the standard, and at the same time giving the largest possible number of eggs.

We are now prepared to furnish customers with thoroughbred breeding stock, which will be appreciated by the purchaser and will substantially aid in building up a more satisfactory and profitable strain. The birds which we offer for sale are large, well developed, strong and vigorous, are the product of pens carefully mated and fed for fertility of eggs and with a special view to strength and vigor of the chicks. The stock which we now have is of superior quality, is guaranteed to be free from disqualifications, and we feel that we have good reason to be proud of the birds which we now offer for sale.

We also have opportunities to purchase from our fellow-poultrymen stock which we personally know is of the highest quality, true to name, up to the standard requirements and bred along right lines; the same guaranty that we put back of stock and eggs from our own farm, is put back of all such goods sold by us.

On the following pages we give a list of the varieties which we are prepared to furnish in large quantities, or in breeding pens, trios, pairs or single birds. Space does not permit us to describe each breed separately or to quote other than a general price list, covering both old and young birds. In all cases we select for the customer the best birds which can possibly be furnished for the amount of the remittance; the birds to comply as nearly as possible with the specifications sent with the order. Prices of large quantities of stock must be a matter of correspondence, taking into consideration the number and quality of birds wanted, and if a customer desires utility stock we may be able to quote a low figure. Pairs, trios and breeding pens of four females and a male mated for best results. Prices of extra fine exhibition stock and all details are matters of correspondence.

All orders for stock must be accompanied by cash, or, if C. O. D. shipment is desired, 50% of the amount must be remitted with the order to insure transportation charges, and return charges on the balance of the money will be added. We cannot in any case send birds on approval at our expense. Customers will receive the best birds which our experience enables us to pick out; and if, when received, the birds do not come up to our guaranty, or are not exactly as represented, we will be pleased to exchange them for others better suiting the taste of the purchaser or refund the money. We can usually fill all orders promptly, but sometimes the weather is not favorable for shipping live stock and all orders are filled in turn, hence to avoid dissatisfaction and any appearance of partiality, we would like, where possible, ten days' time in which to prepare shipments of this kind.

## Price List of Stock.

Guaranteed to be good breeding stock, standard bred and free from all disqualifications.

The general description and guaranty of stock on the preceding pages applies equally to the eggs which we sell for incubating purposes; these eggs being gathered from the same pens producing the best stock raised on our farm. By treating our patrons just as well as we treat ourselves, we feel that, if they do their part, they cannot fail to be well pleased with the stock raised from the eggs which they buy of us.

In selling eggs for hatching no special guaranty is expressed or implied in regard to fertility. We warrant all to be from standard bred stock, true to name, and 75% fertile; this guaranty as to fertility applying only between January 15th and June 15th of each year. At other times the fertility varies with the season, but we do not in any case sell eggs unless fairly well assured that they will run at least 75% fertile. In very few instances have the eggs shipped by us tested less than 75% fertile, and whenever this has occurred we have duplicated the order at half price—a plan which seems fair to our customers and satisfactory to all concerned. We invariably endeavor to please all who favor us with their orders—doing by them everything possible to insure profitable results and entire satisfaction. While we can furnish as good eggs as can be bought anywhere, regardless of the season, (which you will agree with us is all that can reasonably be expected), it should be known that the season has much to do with the fertility of eggs and that detrimental conditions are beyond our control. No claims are allowed for breakage of eggs in transportation; both eggs and fowls are packed carefully and properly according to the best known methods, and delivered in first-class condition into the hands of the transportation companies, where our responsibility as to breakage or damage ceases, as we have no further control over the goods.

In all cases where shipments are damaged by neglect or carelessness we will be pleased to assist our customers in entering just claims and securing reimbursement from responsible transportation companies.
